

**PREMIUM CLEAR**  
**SELF-CLEANING**

**SPECIFICATIONS:**

U-Value	Solar Heat Reflection	Light Transmission	Self Cleaning
1.0	46%	62%	✓

- Our most popular glass choice. 80% of customers go with this option as it all the benefits of solar control with a high light transmission.

**BLUE**  
**SELF-CLEANING**

**SPECIFICATIONS:**

U-Value	Solar Heat Reflection	Light Transmission	Self Cleaning
1.2	60%	47%	✓

- Customers go with this option because they appreciate the aesthetic of blue glass.
- It also has great solar control so is a good choice for people concerned about their room getting too hot.

**NEUTRAL**  
**SELF-CLEANING**

**SPECIFICATIONS:**

U-Value	Solar Heat Reflection	Light Transmission	Self Cleaning
1.2	60%	37%	✓

- The neutral effect has a grey tint which takes away the harsh glare of the sun. As a consequence though, less light is let in.

**CLEAR**  
**SELF-CLEANING**

**PREMIUM AQUA**  
**SELF-CLEANING**

**PREMIUM BLUE**  
**SELF-CLEANING**

**SPECIFICATIONS:**

U-Value	Solar Heat Reflection	Light Transmission	Self Cleaning
1.2	42%	78%	✓

- Our clear glass has the highest light transmission out of all our glass types.
- Perfect for those looking for good value at a low cost.

**SPECIFICATIONS:**

U-Value	Solar Heat Reflection	Light Transmission	Self Cleaning
1.0	82%	30%	✓

- For customers that are south facing, who are worried about their room getting too hot, this glass option is for you. We consider this the "Rolls Royce" solution perfectly balancing solar control with light transmission. This is the glass we recommend if it fits your budget.

**SPECIFICATIONS:**

U-Value	Solar Heat Reflection	Light Transmission	Self Cleaning
1.0	80%	27%	✓

- This glass has high solar heat reflection but sacrifices a lot of light transmission. It also has a deep, rich blue. We only recommend this glass for very large lanterns which will offset the low amount of light coming through.
